MEMORANDUM FOR: THE DIRECTOR OF CENTRAL INTELLIGENCE AGENCY

SUBJECT: Estimate of Capabilities of Subversive Elements to Reduce
Petroleum Supply in Selected Countries.

1. In connection with studies on availability of petroleum products to the United States Military Forces in event of war with the U.S.S.R., the Army-Navy Petroleum Board desires information on capabilities of enemy agents and anti-U.S. elements for reducing the amounts available during the initial stages of hostilities.

2. Inclosed are copies of letters addressed to the Department of State and the Federal Bureau of Investigation on this subject. It is suggested that the Central Intelligence Agency provide the Army-Navy Petroleum Board with any estimates readily available on the capabilities of subversive elements.
